formation they had prosured. We sat together for a long time discussing the matter. What appeared to slarm him very much was the matter of Mr. Hodeun's LO. had occurred, and he was very much frightened about it. Kirk had detarled, substantially the some stutement or Kirk had made before Judge Korgh, against Campbell. He also told me what comebody clee had detailed against Campbell. That, of course, I know detailed against Campbell. That, of course, I know nothing about I had not besed about it until then posking about I bits I but it trads bearing me I serve b base would see Campbell. I went on the following day, and new Mr. Hodson, and investigated above, tha I O.U's—the facts of which were, I found structly what I had personed before. I told him he would

have to not the empost homely, that he should enter the transaction is the books, and "be ready to explain office in Abbey-street, and explain the matter fully to the gentlemen there." I also teld Mr. Hodson to the gestionen there." I also teld Mr. Hodara to send Completi to me. Completi was at that time come to me cither on that or the following day, to my office in Sackville street. I heard how my be med me previously at the Post-office. I do not remember whether he did or not; at anymic the interview between an took place in my office in Sackvillo-street. I had heard what was sween against Campbell, and I considered that it amounted to a charge square him; not of bribery, but of lawing mode use of his knowledge of what was going forward for the purpose of

putting money into his own pocket, both at the exwas bulking them. I therefore resolved not to well the charge before Compbell in that shape at all, because it might induce hen not to tell me the troth about it, but to dear it. When I saw Campiell in my office, I simply told him that I had heard that in a house in Capel-street, tickets had been given to fromes, that he was concerned in the matter, and had brought freezen there to receive money upon tickets which they get. Complett denied to be me. I saked him over and over agun, and investigated as for as I sould into the motter, I went much solemnly chaply, with the object of meertaining what was the treth of the matter. Comptell assured me, and I

anneed on time or a promophers day, compared did attend at the office in Abbey-struct, when Mr. William. son, Mr. White, Mr. Striton, and mynelf were present, and he was examined fully by Mr. White, and it was then only that for the first time Campbell was told the distinct matery of the charges against him atill presisted in decising his impounts, and I was impressed with the idea of his impounts up to the tion of the investigation before Judge Koogh 48853. It was on the occasion in Abbey-street that Compkell was for the first time reformed of the charge made against him! He was then for the first time

48834. You concentral from hom on the occasion of your provious interview with him, what the nature of the charge against him was !- You, I did so, in order that he might be induced to tell me the truth, as I thought that if these was any believy really countitled by him he would have told me; and my wish wonand so I told him-to decover the truth, and that he time tell him the exact nature of the charge against

him, which was not that he was concerned in believy, but a charge of a very different character.

48315. You have stated that a few days afterwards he attended in the office in Abbey-street, where he was examined by Mr. White. I presume he was then told the further facts which involved him still more in the matter to Yes, he was cross examined, as I have told you, with the hope of accertaining what was the These silepstons had been made against him by men who, so we believed, had been poid large sums of the value of their evidence. That evidence would have been valueless unless believy was brought home to sensitoly in consection with Sir Arthur Guinness. and what mainly convinced me of Campbell's innocease was that he was only mentioned by two or three, and that he was the most blody man to bring home agency

done with respect to Campbell; and it is best to mention the view we took. It was this :-- We quarrelled with Judge Keegh's report on behalf of the Conservative party, as being unsupported by the evidence. Me John Fox Whether we did that rightly or wrongly that was our case. Judge Kooge had disbelieved Complett and had believed the systemes of freezess who had morived layer garra of money for their testimour. considered that, although the impression made on our

regions to denies him. He had swom positively as against the tactimony of those witnesses, and by dis-Fring him we would be afferring the soundness of Frings Koogh's verset. "He is an officer," we said. "let us keep him -and scoordingly we did keep him; and, moreover, it was urged that Campbell, being a men known to be well acquainted with the freemen of Dablin, and this Commission being spoken of sa pro-hable at the time—it was urged that it would be extremely desirable to soome that Campbell should be and with those views Campbell was retained and paid his salary; hos, as a matter of produces, an past an energy 105, as a mentur or produce, to election being upshers of an likely, and prepara-tions being made for it, it was considered not predict that Compbell should be cognized in the matter, lest it might come under the provisions of a section you are aware of. 48903. I presume the apprenticultip of a Roman Catholis to a Protestant framus master is not a very common thing !-- I should say it is not very common. Mr. John Fox of Roman Dalloito to Protestant freemen, in your spinion 1 - I could not my scountaly. I should my twenty or twenty-dre per curt, would be the cuttide. There is enother point I wish to explain, as to the pay-

ment of the expenses of admission of freemen. It was said that all, or nearly all of the freemen, were mid for by wa. That is not so. There is no use in guesting when I can give you the accumic mambers. Estween was paid for by us. In 1968, 141 feeces were nominated on the Conservative side, of whom 73 were neld for. In 1899 the number admitted was 33, of iars 16 were paid for. (Winner lands in return.)
48905 Mr. Taxov.—Have you the returns for on

engler period 1-I have not. as to paying for administrate was changed within the but fow years !- Since I came into office I gave directions which were to be excelully observed as to the principally young man and respectable clerks, who, of course, had no great object in paying the money themrelease but on whose support and interrity I could rely

Those are the class of men we want as respectable men. 88507. Mr. Taxpy.-Assuming, now, that the free nex were disfragelised, how many of the entire untaker would be actually disquisited as voters !... I will tell you. I have endeavoured since this Commission sut, to proceed, as far as I could, information upon that subject, and of course what I say now, if it be worth the that comething about 800 would less the right to vote if the freezen were disfranchised. I can send you in a list in which will appear the names and addresses of every one of these persons (about 800) who, according to the best information I have been able to obtain will

less the franchise. 47908. That corresponds very slouely with the ortimote of Sir A. Guinness !- I dura may Sir Arthur

. Guinness mode inquiries. 47503 Mr Lav .- Mr Sutton gave a different call mate !- It is a mistake what he stated. He stated named by the first that the state of the sta not be the moorer class of freemen !- Certainly not. I Nava looked over the list of the 300 for the purpose of endeavouring, if it were possible, to clearly them ; and, as for an I optild judge, the crass stands thus-one of the first names on the lat is Mr. Adair, son of Mr. Adair of Merrico-square, the beauster. He represents out inportant elns who would be disfranchised -- that is, vogag professional men, some of the most respectable realdence, and who, living in their father's horses, could not be considered so lodgers-a large number of that clear would be disferrablised. One of the root on the list is Mr. Alexander Bete, the represents another class) a respectable solicitor in Dublin before he become charl recistraz. Ha residua gerteido Dublia. He cannot realife cert of his offices in Dublin though he way now 450 or 500 a year for them. He is the segrecutative of another class who would be distractions.

48911. You meen the numeroridents !-- Yes ; persons living outside, but having offices within the city.
Next, there are the class of merchants whose hungers does not require extensive premises in Dublin, and who live oritide the city, though deing hunnes in it: a number of them would be disfrachised. Next, there is a large clean of persons, for whom I would take as is a large clean or persons, for whom I women can re-representative Mr. Joseph Harrin, who was commined before you. He is in the establishment of Mosses. Ferrier and Pollock. He lives omiside the borrough, but, no reconger of that establishment, he is as minch

existence. He represents a large class who would be disfranchised. 48012. They are also non-runidents !-- Yes; but hey are as much interested in the city as any ness.

elerks; and then come trademann and so on, down to freeman of the power surt; but I should think that on smong those 500 who would be especial of receiving bribes, or who in fact belong to what would be called

the poper class of freezes-certainly it would not 48915. To what class would you say the "bribable" frances world belong i-Well, you have had pure-48014. Do you think none of them would ourse

off 1. Yes; I shink some of them would come off, 68915. Yes may 150 of the power class would some off !-- Yes , that is the outside, but I would not even go as for as \$10.
48916. We have lind it proved here that in the years 1850 and 1867 some of the frommen were bribed in the most palpable way, by money passed from hand to hand, how many of that class to you think would neually come off the first of voters !- Very few. Owing to the reduction of the raind occupier franchise to £4; and the introduction of the folger franchise, greater transfer of that days of freezeen would get on covered their qualification is perfect, and all that is required in to live in a house worth A4 a year, or to occupy lodgings worth is. a week, and there are very few of them who do not do that, so that the great majority of them would got on the list either as rated complete or as lodgers. Some of them no could would come off. About 800 would come off altegration. I don't mean to say thus in amontly correct; but it is the result of the inquiries of the inspectors engaged for years, and who know the city. I will give you a list of the 900 persons, who, according to the Sacrurits I have made, would be defrenchised.

48917. Then the effect of your evidence in this that a very considerable number, in fact, the majerier of those who would be disfranchised would be persons of the most respectable classes of life! - I certainly think so, and as I have said already, my statement can be tested, as I will give you the date on which I have formed my opinion. 48318. My Law.-But of course the data which you undertake to give us have been collected by cour impectors, and that is a next of thing which we your impresses, and that is a serve or using which we have no test of at all i—You can apply no test to that. What I have got prepared for you is a copy of the frequen's list, and the names of those whom we

think could not qualify out of other qualifications are marked with red tok. I would have lad it ready for you now, but the list for this year was not published till the other day, and I wished to best it upon 43919. The official document which we would up eed upon would be the clark of the peace's list of fromen, and the clark of the union's list of rated occupiers - that would include a large number of the freezen who would otherwise come off - Yes.

43120. But I understand you to have proceeded upon something further than that 1—Yes; the clark of the private but shows a large comber of freezen who would be spitiled to the franchise as rated occasion-48921. But you go beyond that—you take the residue, perhaps 1,000, or whotever the number may be, and from the local knowledge of your inspecture, you strike off 200 more !- I would not say their in formation extends to so many as that. They strike out a number who they think from the inquiries they have much would get on the list by property qualifor-tion, and some who could qualify for establishments

> (8935. How could they get on the list if not en titled as rated occupiers, in which case they would not

appear in the clark of the union's list 1-The improters know that in some cases persons are in possession of premises in respect of which they could daim to be separately misd, and so get on.
48913. That is a matter on which, colors we on emined the importors, we could not have any evidance!-Well, I of course would rather the return was the other way: but I wished to make it so correct as I can. We find there would be a certain number of respectable persons who we know could qualify in that way.

48224. Mr. Tarry. -- I am quite sore that in pre-

Containly. Mr Monais --- You say from 160 to 160 of those who live in lodgings and do not pay for their lodgings so much as 4a a week assist. maring any list you fernish to us, you will give us the Mr. Seessel Tuelor Bradburse here handed in letters, and said—We have been asked for some letters. letters I hand in are from freezon; the betters returned are letters from lodgers and rated occupies. I wish to explain the reason of the delay in giving in letters was, that acces of them were in Louden, and others in Galway, and we were obliged to send to both places for them.

THIRTY-SIXTH DAY.

MONDAY, JANUARY 10, 1870.

51405. Mr. Law.—I think, Mr. Vence, your last candidature here was in 1805 i—You 51405. We have had fermoled to us on Saturday by Mr. Gitson, a copy—at least I pressme it is n copy, of the expense agent's scount for that election, which

I haliere was a joint account fee you and Mr. Geinness? Mr. Gibeer's hand. That was the account rendered me by Mr. Barker, the expense agent 51407. I presume it was went to you at the time as

a copy, and that the original was longed with the shear? I-I presume to 51403 It was sout to you in September, 18551-51409. A copy was sent to each member, the origi-

and being ledged with the sheetl, and this is a copy i-51410. It appears from the evidence that money to some exicus at all creats was paid to fromme votors at the elegion of 1865 or short that tens, and we are under the impression that eventually that arrevers, whatever it was, was repold by you after some time or at least it is no stated to us. Tell us about when

amount that was 1-The amount was £80, so far as I can recollect. It was not more than £80 51411. It was a considerable time after the election that menty was paid !- A considerable tune after the

election I remitted it to my brother on his stating to me that he had raid it to save my home being pailed 51412 Now with the exercises of that assessed which came to your knowledge in that way, after the

sloction did yet hear, as connected with the election of 1865, of any other zoney being expended 1. I did rem't a small erre to Mr Gilenn other many applications from him ; it may have been \$40, or \$40, or 270, but I cannot being the amount to my memory say, and it was for some were eccuents after the electhe money from Engined for ward secounts. ware both paid a considerable time after it, but much about the more time. 51416 Did you hear of new improper dealings with freemen at that election on other sale—either on your own dile or on the risk of Mr. Punt.—The only thing was the that when I had an interview with Mr. by the charman of our committee, Colonel Brameton South, and Mr. Guinness was very nervous on the subsect of bribers. We assured him that we had never

spent a shilling at any of the previous electrons in the way of inthery. My expenses in 1807 and 1859—the two payerious elections—were under \$1,000 or about £1,800, and as to bribery we stated that there was no apprehension of anythrug of the kind. I should tell the Consequences that from my moraties on my marray in 1963 I quite despréed of success, for the entire body of the Qualtyre who are great corpleyers of labour in this city—including Mr. Pice, who formerly voted for me, reversed their votes, and I found in the basels of the freegen to an onormoun extent convaning papers on which considerable sums were past on behalf of My. make those inquiries. For instance, in 1868, after the very last week of the revision to supply the addresses of those who have changed—you got them in the very last week, and then you have to send out inspectors in every direction to see whether they are correct or pat.

57512 When a man is objected to, is he not bound

You state that now !-- I do most positively As I have been in the habit of attending the Beverian Courts perhaps, you would permit me to state what is for as they were concerned, the revising harristers made a rule (I do not know whether it would stend etrict in vestigation) to act upon evidence that other courts would not not upon, owing to the large constituency they must do it; but that rule is not confined to freezen, it is a more matter of loos procedure. But as to the fromen they have added this antiquard : either side objects to the names of parties whom they believe have capter so as allines to pursus whom may believe have changed their residences. These objections are beself, and it is sufficient to say that the party has left the abode he was in, and he given of. The other sufe find out where the person has gone to, and the evidence or to his change of resistance must be given by an inspectoe, but he is cross-counteed as to the source from which he derived his information, and unless he satisfice the borrister that it is correct, the name will no be restored. here, a man of the name of Moy, mentioned that he used to set dianers formerly; but those were dianers given to the officers of the graid; for instance, when I given so any efficient matter ground; for considerity when it were myself elected matter I given them a diment, but it was not for the purpose of builtery, it was for the purpose of good fellowship. It was not given by the mumber of Parliament, nor the conditions for the memors of Parliament. Of course you know the Right Hop, Heavy Grattan would not six down with a people of mechanics that he gave a dimetric. They were dinners given by the musters of guilds, stated radii, every decent freeman that came in, would exhsurfle numehing bowness the poors brothers, and we had olme-humes. And if the freemen had ben-left alone at the choticus they would have come up freely best to vote, and they were legst back on freely ness to vote, not tany were topic to the that they were knot back by people giving out week that there would be something going.
